Work

2018 - 2019

Software Developer
Epic Systems
- Solved high priority, regulatory issues critical to customers' financial success.
- Worked on bug fixes, user interface updates, and implementing new features.
- Developed in Caché/M, VB6, C#, and Typescript.

Projects

2020

Fanchat
- Progressive web application that allows fans to chat with their favorite influencers through a subscription-based service.
- Made with React Native Web, Firebase, and Redux.

2018

Illini Events
- High-fidelity prototype of a mobile application designed to increase traffic to campus events through reward incentives.
- Made with React Native and Redux.

2017

Message in a Bottle
- Simple mobile application that allows users to set goals, vent throughout the process, and finally motive them to complete their goals.
- Made with the MERN stack: MonogoDB, Express, React Native, and Node.
